To Whom it May Concern

**LINGARD LIMITED - MITCHELL LAITHES WASTE WATER TREATMENT WORKS,
DEWSBURY**

As part of our contract to refurbish Mitchell Laithes WWTW we were confronted with latent defects and leakage from the primary settlement tanks.

We invited Lingard Limited to survey and inspect the cracks in areas between the weir walls and dividing walls and provide us with a long-term solution which would be acceptable by the Supervising Engineer, Mott Macdonald.

Lingard were engaged to provide access, clean out all areas of brickwork and concrete, carry out concrete repair works, grout off the joints/cracks and finally install a crack bridging hypalon rubber strip to accommodate future structural movement.

They provided us with full method statements and risk assessments to meet Health & Safety demands required by ourselves and Yorkshire Water and carried out the work in a carefully executed manner leaving us with totally dry leak free settlement tanks.

We have no hesitation to recommend Lingard Limited to any potential clients and they are retained on J N Bentleys record as a competent contractor.

Yours faithfully

Rob Cowley
Senior Quantity Surveyor
